### Strategic Partnership Forged Between 3DT LLC and SICATECH

With the goals of developing and serving the European market better, 3DT LLC of Wisconsin, USA and SICATECH of Linde, Denmark have formed a partnership. Effective November 1, SICATECH will oversee sales, service, and support for 3DT in Europe.

This partnership unites two pivotal companies in the surface treatment and pad printing industries. It puts “feet on the ground” in Europe for 3DT, bringing many benefits to their customers and agents. These benefits include, European service and support, additional sales personnel, reduced shipping time for standard systems and spare parts, and compatible business hours. Additionally, the combined industry knowledge and experience of 3DT and SICATECH will work to overcome adhesion challenges by providing solutions that stick.

3DT LLC is a leader in surface treatment technology, manufacturing a comprehensive line of corona and plasma surface systems as well as custom systems. With more than 25 years of experience, 3DT’s innovative and highly effective engineering solve adhesion challenges on 3-dimensional objects, film and most substrates.
